

Our Mission

Provide forward looking and efficient cybersecurity, program management and Health IT services for the healthcare industry and government, including HIPAA/HITECH assessments, FISMA/DIARMF compliance, policy reviews, Authorization support and strategic planning.

Our Customers

Defense Health Agency • US Navy • NAVWAR • Veterans Affairs • Charleston County Airport Authority (CCAA) • Industry HIT Vendors

How To Do Business With Us

Seaport NxG • Joint Venture (8a)/Native American Indian/HubZone

Services

Information, Design & Network Solutions

- ☒ Cybersecurity / RMF
- ☒ Server Consolidation & Virtualization
- ☒ Certification, Accreditation, & Compliance
- ☒ Information Technology Design
- ☒ Network Infrastructure Design & Configuration
- ☒ Cybersecurity Policies & Procedures Development

Security & Testing Solutions

- ☒ Application Delivery Networking & Security
- ☒ Wireless Security Assessment
- ☒ Vulnerability Assessment & Penetration Testing
- ☒ System Pre-Certification Security Assessments
- ☒ Continuous Risk Monitoring

Recent Past Performance:

- DHA / VA Go Live Support: ACG Developed an Integrated Dashboard for DHA Leadership which produced DHA/DHMSM/VA Visualizations for a PPSM Database, ServiceNow Tickets, Community Based Outreach Centers, eMASS expirations, Joint Security Architecture build status, and Go-Live status/schedule.
- DHA Risk Management Operations Support Services
- Cloud migration & associated RMF / A&A tasking for USN MFOM
- ACG Developed and Integrated a PPSM application among VA, DHMSM, Leidos and DHA Personnel to support the implementation of Electronic Health Care Connections.

SC Office Address:

5617 N. Rhett Avenue, Suite 125A, North Charleston, SC 29406-3509

 US Veteran Owned

95% Cleared Employees

50% Employees are Veterans

 NIST 800-171 Compliant

90% Percent Certified Staff (CISSP, CMMC, CISM, PMP, SEC +, MCSE, etc.)

 Degreed Staff: Doctorate, Masters and Bachelors

CART

Cyber Awareness Reporting Tool

To meet Federal Information Security Management Act (FISMA) / Risk Management Framework (RMF) requirements, United States Federal Government agencies must remain aware of cybersecurity threats and vulnerabilities.

Historically, the process of documenting and analyzing security scan results required immense manual and tedious work for cybersecurity (CS) professionals. A typical organization may face 200,000+ lines of vulnerability data to assess or compile manually.

Athena Consulting Group, LLC developed the Cyber Awareness Reporting Tool (CART) to automate this task. The CART application is a single test event, rapid assessment, and reporting tool that aggregates, sorts, and graphically displays data to enhance and streamline the Security Assessment process.

Benefits

1. Reduces both human error and labor hours by automating aggregation of all scan results.
2. Condenses and combines reports from multiple cybersecurity scanning tools.
 - ☞ Eliminate multiple counts for the same vulnerability.
 - ☞ Quickly incorporate results from all sources to help prioritize remediation.
3. Streamlines plan of action and milestones (POA&M) generation and maintenance.
 - ☞ Automatically generate an accurate POA&M within minutes of finalizing all platform scans.
 - ☞ Simplify POA&M maintenance during re-scan for lifecycle IAVM.
4. Allows quicker turnaround between vulnerability scan and the start of the repair process, enhancing ability to maintain and comply with FISMA / Risk Management Framework (RMF) requirements.
5. Provides relevant vulnerability reporting to all levels of command from leadership (site and enterprise), to the CS workforce (ISSMs, PMs, ISSOs, Technicians, Administrators), and Testers.

Quick facts

-  1 Year License
-  1-3 User Options
-  User Guide
-  Microsoft Access 2010 or above required to run.

CART is capable of importing:

- ☞ Nessus Scan Results (.nessus files)
- ☞ SCAP Compliance Checker (SCC) results (xccdf reports)
- ☞ STIG Checklist Viewer (.ckl files)
- ☞ STIG XCCDF Manual STIG Templates (XCCDF XML files)
